Price List Better Trees and Plants Feb. 1931

PRICES are f. o. b. Neosho, except certain items quoted delivered.

TERMS—10 per cent deposit with order and balance before shipment. Under \$10.00 all cash with order.

REPLACEMENT AT HALF PRICE

If the customer reports by October 1st following planting, we will replace at half price any stock that fails to grow, but we should not be expected to replace if failures are due to such causes as drought, floods, or neglect.

TRUE-TO-NAME WARRANTY

The best guarantee of trueness-to-name is the precautions and care we take in handling and labeling our stock. If, however, any tree or plant should prove untrue-to-name, it is understood and agreed that the Neosho Nurseries shall be liable for the sum paid for the stock which may be proven untrue and shall not be liable for any greater amount.

TESTIMONIALS

I am glad to report that every plant ordered from you (198 Shrubs and Perennials, 7 Evergreens) has lived through the summer. It has been a continual job of giving them water daily and the fall has been so dry that even then the hot winds together with the sandy soil have not hurt them severely.—Walter Rinehart, Kans.

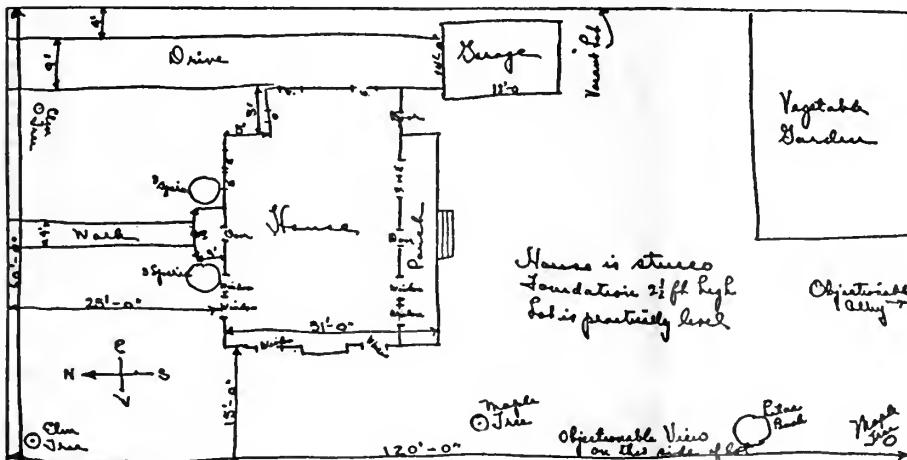

To Whom Concerned:

I have sent 3 orders to the Neosho Nurseries Co. and have never had such prompt and courteous attention from any one else. I have found their stock to be the most reasonable in prices in accordance with the fine quality of stock received and am impressed with the way every piece has grown.—W. P. Harrell, Fla.

How to Enjoy Neosho Landscape Service

OUR Landscape Service is available to you even though your home is in a distant state. Send us a sketch and full information as specified below. We will then prepare a detailed plan, incorporating original ideas which will enable you to secure practical artistic effects which will increase the attractiveness, enjoyment and value of your property. With the information required send us your check for \$5.00 which will be applied on the purchase price of the trees, plants, etc., when your order is received.

The plan we submit for your approval will show the exact location of each tree, shrub, etc., and will furnish an accurate guide for planting. At the same time we will give you an estimate of the cost of the plant materials required.

Example (reduced) of rough sketch sent in by customer.

QUANTITY RATES apply on trees or plants of the same class. 25 apple or crabapple take the 25 rate, but 5 apple, 5 peach, 5 cherry and 5 plum take the 5 rate. 5 shrubs of several varieties take the 5 rate.

INSPECTION

Our stock in the field is carefully inspected by expert State Officials and every shipment carries the Missouri Certificate of Inspection. We comply with the regulations of other states.

PARCEL POST SHIPMENTS

Bulbs, Garden Roots, Iris, Lilies, Peonies, Perennials, Roses, Shrubs (not over 2 to 3 ft.), Trees (not over 3 to 4 ft.), Vines and Violets can be sent by Prepaid Parcel Post if you will add 20 per cent to amount of order. We will refund any difference in your favor.

GUARANTEE

We guarantee your satisfaction upon arrival of your order. If you should receive any unsatisfactory stock, heel it in subject to our disposal. All claims should be made immediately upon receipt of goods.

APR 15 1931

Stock was received in fine condition and was certainly very satisfactory as the plants were much larger than I expected. Morris Seiple, Mich.

I was surprised when I unpacked the order to find such fine stock. I never received such goods from any one else. I planted them this evening and if they don't grow it won't be your fault.—D. A. Williamson, Pa.

I received the wonderful plan you outlined for my garden some time since and think it is one of the most beautiful I ever saw. Words fail me when I try to express my appreciation for your splendid service.—Mrs. R. Lee Alford, Mo.

Every plant I have bought from your house has given splendid satisfaction.—Edna Barlow, Mo.

The drawing at the left shows how to prepare a rough sketch not drawn to scale to supply the information we must have. Please answer all questions fully.

RICHARED (Trade Marked) DELICIOUS

This strain of common Delicious colors up a solid red two or three weeks earlier but is identical in flavor, size, shape and texture. The Richared originated near Wenatchee, Washington, in the orchard planted in 1910 of G. T. Richardson. Trees of the third generation grown from this original tree have borne fruit true-to-strain.

Wherever the common Delicious thrives, this Richared will prove more profitable because it can be picked and marketed two weeks earlier with solid red color. Windfalls are avoided and the keeping quality is better.

Purchasers are required to sign an agreement not to sell or give away or dispose of any buds or scions from these trees.

BLAXTAYMAN (Trade-Marked)—

This is a new introduction from Wenatchee, Washington, a sport of the common Stayman Winesap—identical in every respect except that Blaxtayman colors up a solid blood-red. It has the same advantages over the common Stayman as the Richared does over the common Delicious.

Purchasers are required to sign an agreement not to sell or give away or dispose of any buds or scions from these trees.

"You may be interested to know that the trees that I bought from you early in 1920 have long since matured into as fine a young orchard as there is in the state of Vermont. Out of nearly 600 apple trees that I received from you every one proved true to name and not one tree was lost from any cause that could be attributed to the lack of care in packing or to poor quality of the stock. In fact, I was so well pleased and so well treated by you, that I hope to place an order with you again this coming spring." January 24, 1931.—David R. Pichard.
